

# PocketPal

your money,  
your way

# WHY POCKETPAL

Many people find it hard to manage their money and stay on budget, often losing track of spending and missing ways to save. Traditional tools like spreadsheets are difficult to use and don't give a clear view of financial habits. This Personal Finance Tracker app aims to make budgeting easier by letting users log expenses, set goals, and view spending patterns. With simple charts and summaries, it helps users see where their money goes and make smarter choices. Overall, it's a user-friendly tool to help reduce financial stress and improve money management.

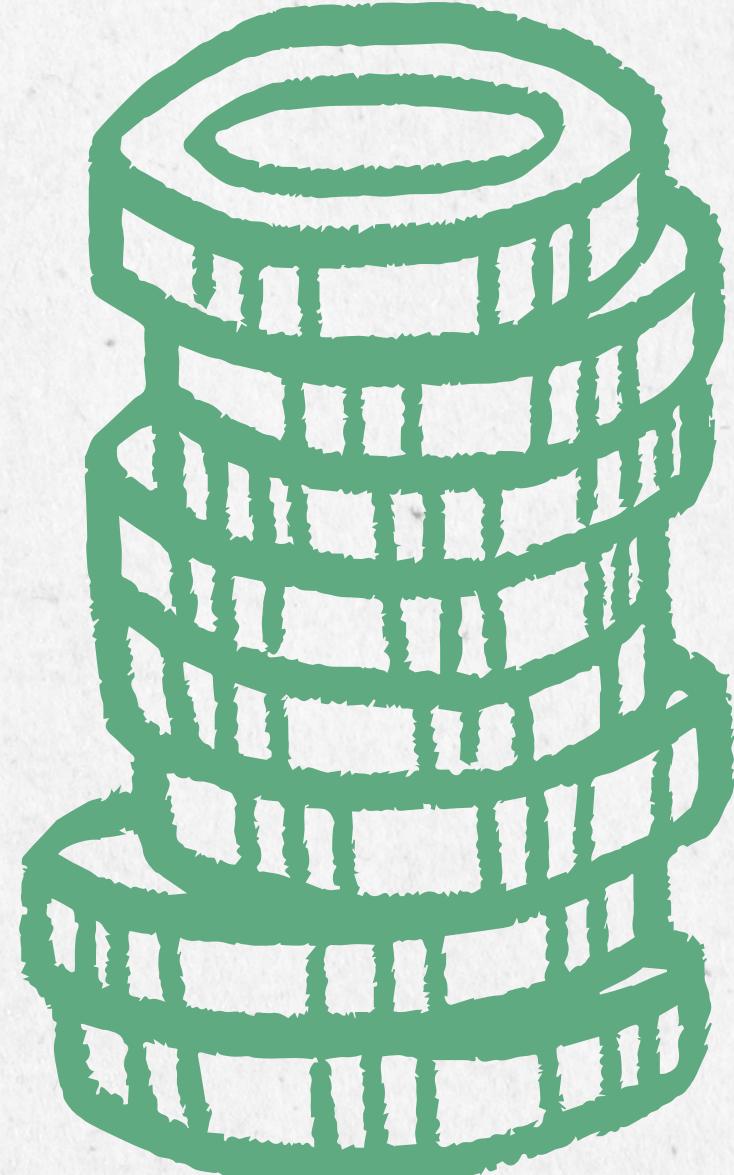

# FEATURES

- ★ Add Expenses and Incomes by different category and source
- ★ Users can export their expenses and incomes in Excel, CSV or PDF. (filters are present to download data by year, week, month and today)
- ★ Visualize data by a graph. Graphs are using filtering to show data of month, year, week and today.
- ★ Users can change graph options. (eg: piechart, bargraph, linegraph, etc)
- ★ Users can import incomes and expenses from a csv and excel.
- ★ Users can also search expenses and incomes present in their account
